The screenshot displays the LUPOP website interface. On the left is a sidebar menu with the following items: 'Study support' (with sub-items: Q and A, FAQ, Terminology, GDPR, Research funding), 'Population data at LU', 'Population data outside LU', 'Seminars and work-shops', 'Courses', 'Connect and collaborate', and 'Documents and links'. The main content area is titled 'Q and A' and includes the text 'Questions may be submitted in either English or Swedish.' Below this is a form with three fields: 'Your name *', 'Your e-mail *', and 'Area *'. The 'Area *' dropdown menu is open, showing options: 'Select -', 'Application for data access', 'Biobanks', 'Ethics', 'Legal issues', 'National registers', 'Research application', 'Study design', and 'Other...'. At the bottom of the form, there is a small text line: 'To verify that a real person has filled out this webform, we ask you to fill in...'

Study support

One of the aims of LUPOP is to provide support to researchers at Lund University performing population based research. Support may include help with study design and scientific approaches, writing research applications, applications for data access, and ethical and legal issues.

First check in the FAQ-section if your question has already been answered. If not, send us a message through the Q-and-A form.

Submit information to the public

If you have information that you want to make public, fill out the form below and PI (currently [Anna Axmon](#)) will review it and publish it on the LUPOP website.

Note, if you want to reach people in Sweden, you should preferably write your message in Swedish.

Opt-out

If you need to provide the opportunity for cohort members to opt-out of new studies, you can apply to the Regional Ethics Committee to place the information on the LUPOP website. They consider all such applications on a case-to-case basis, and there is no guarantee that you will get the approval. However, if you do get it, we will publish your information on the LUPOP for the public (LUPOP for allmänheten) page. People may enter from the LUPOP start page, or through a direct URL. You may also add a link to the LUPOP website from other public web pages to increase visibility of your project.

Once you have approval from the Ethics Committee, use the form below to provide us with the information you need to publish. You also need to e-mail the application to and the decision from the Ethics Committee to lupop@ed.lu.se. If all documentation is in order, we will publish your text within one week (five working days).

To view current ongoing projects, click on the image to the right.

Start › LUPOP › Kartläggning av spelproblem och spelberoende bland klienter i svensk socialtjänst

Kartläggning av spelproblem och spelberoende bland klienter i svensk socialtjänst

Bakgrund

Problematiskt spelande om pengar förekommer hos 1,5-2 procent av den vuxna befolkningen i Sverige. Bland personer med alkohol- eller drogproblem finns det skäl att tro att förekomsten av spelproblem är betydligt större. Det är viktigt att upptäcka spelproblem för att kunna ge rätt typ av behandling.

Många svenska kommuner utreder klienter med Addiction Severity Index (ASI) när det finns skäl att utreda alkohol- och droganvändning hos klienten. I det instrumentet saknas helt frågor om spelproblem. Vår forskargrupp har därför tagit fram en ASI-modul som kartlägger spel och spelproblem. Vi har tagit fram ASI-Spel tillsammans med socialstyrelsen och det företag som för närvarande står för IT-stödet för ASI-användningen för många svenska kommuner. I den här studien kommer vi att studera spelproblem hos klienter som undersöks med ASI i svenska kommuner, och hur spel har samband med andra frågor i ASI. Vi är också intresserade av vilka typer av spel som är problematiska och vilka samband de har med andra faktorer.

Studiens frågeställningar

- Bland klienter som undersöks med ASI i svenska kommuners socialtjänst, hur vanligt är det att ha ett problematiskt spel om pengar?
- Vilka andra faktorer i ASI har samband med spelproblem, t ex annat missbruk, psykisk och fysisk hälsa, och andra frågor som handlar om t ex ålder, kön, det sociala livet och andra problem som framkommer i ASI?

• Vilka samband har samband med spelproblem, och vilka samband har de med andra frågor i ASI?
